Three recognized Types of Addresses
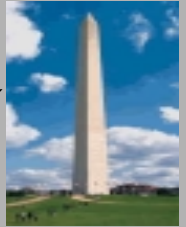

Geographic

-Alias = positional

-Set of precise and complete geographic descriptors that use a coordinate reference system to provide the unique location of an object.

Physical

-Alias = Situs, Delivery

-Set of precise and Complete information that indicates by relationship or by description the permanent and unique location of an object

Mailing

-Alias = Postal

-Set of precise and complete information on the basis of which an item can be forwarded and delivered to an addressee without searching and without there being any doubt.

ARE THERE ANY OTHER TYPES???

Proposed Addition to Annex C

Name	Source	Definition
Fractional street number	USGS	A sub-number to a street number

Proposed Additions to Annex C

| Name	Source	Definition
Geographic		
Latitude degree	Text	First unit of measurement 0-360 degrees domain
Latitude minute	Text	Second unit of measure 60 minutes = 1 degree
Latitude Second	Text	Third unit of measure 60 seconds = 1 minute
Longitude degree	Text	First unit of measure 0-360 degrees domain
Longitude Minute	Text	Second unit of measure 60 minutes = 1 degree
Longitude second	Text	Third unit of measure 60 seconds = 1 minute

Puerto Rico address structure
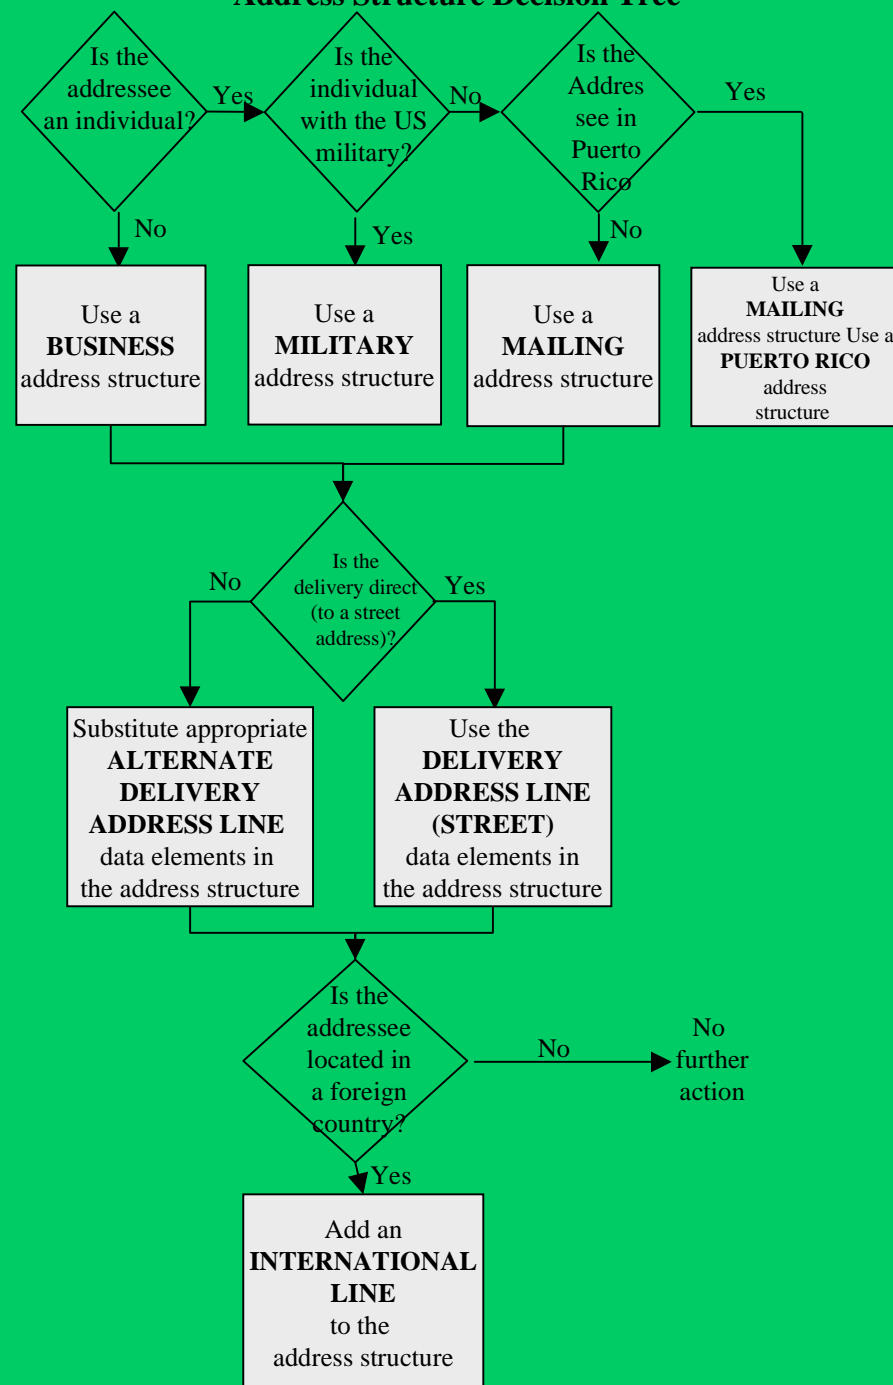

Addressee Name

Street and Number Line - alternate

Urbanization Line

Last Line

Address Structure Decision Tree

Left Diagram

- **Is the addressee an individual?**
  - **Yes** → **Is the individual with the US military?**
    - **No** → Use a **MAILING** address structure
    - **Yes** → Use a **MILITARY** address structure
  - **No** → Use a **BUSINESS** address structure

- From BUSINESS / MAILING → **Is the delivery direct (to a street address)?**
  - **No** → Substitute appropriate **ALTERNATE DELIVERY ADDRESS LINE** data elements in the address structure
  - **Yes** → Use the **DELIVERY ADDRESS LINE (STREET)** data elements in the address structure

- → **Is the addressee located in a foreign country?**
  - **No** → No further action
  - **Yes** → Add an **INTERNATIONAL LINE** to the address structure

Right Diagram

- **Is the addressee an individual?**
  - **Yes** → **Is the individual with the US military?**
    - **Yes** → Use a **MILITARY** address structure
    - **No** → **Is the Addressee in Puerto Rico?**
      - **No** → Use a **MAILING** address structure
      - **Yes** → Use a **MAILING** address structure Use a **PUERTO RICO** address structure
  - **No** → Use a **BUSINESS** address structure

- From BUSINESS / MILITARY / MAILING → **Is the delivery direct (to a street address)?**
  - **No** → Substitute appropriate **ALTERNATE DELIVERY ADDRESS LINE** data elements in the address structure
  - **Yes** → Use the **DELIVERY ADDRESS LINE (STREET)** data elements in the address structure

- → **Is the addressee located in a foreign country?**
  - **No** → No further action
  - **Yes** → Add an **INTERNATIONAL LINE** to the address structure
